- Comprehensive server management, encompassing configuration, monitoring, and execution of DevOps tasks to ensure system stability and security.
- Close collaboration with multidisciplinary teams is essential for proactively identifying and addressing business needs and customer requirements.
- Implementing development and maintenance best practices to enhance operational efficiency and final product quality.

FULL STACK DEVELOPER

Linkk Tech Solutions - April 2023 - February 2024

- Leadership in strategic project management involves close collaboration with the client to comprehend their needs and business objectives.
- Comprehensive server administration and integration of functionalities.
- Offer continuous technical support and proactive maintenance to guarantee uninterrupted project operation.
- Full-stack development across diverse business projects, from conceptualization to implementation, ensuring quality and efficiency in all stages of the process on both the back-end and front-end.
- Active collaboration with multidisciplinary teams is essential to ensure the timely and successful delivery of projects, meeting client requirements and quality standards.

FULL STACK DEVELOPER

Diey.io - December 2023 - February 2024

- Front-end development focuses on creating an intuitive and visually appealing graphical interface to enhance user experience.
- Backend development for multiple endpoints to ensure the robust and efficient functionality of the application.
- Seamless integration of new features and components to enhance system capacity and versatility.
- Implementing optimizations, refactorings, and performance enhancements to boost the speed and efficiency of the application.
- Close collaboration with design and development teams is essential to guarantee the consistency and quality of the final product.

FULL STACK DEVELOPER

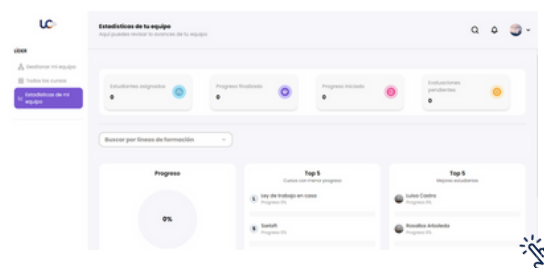

The U-Corporate - July 2023 - February 2024

- Front-end development of the graphical interface to ensure an intuitive and appealing user experience.
- Establishment of connections with the backend to facilitate seamless communication between the client and the server.
- Continual maintenance of the application, encompassing troubleshooting, bug fixing, and update implementation.
- Integration of additional features based on project specifications and client requirements.
- Enhancement of application performance through code optimization techniques, configuration adjustments, and performance testing.

PROJECTS IN WHICH I HAVE BEEN INVOLVED

THE U-CORPORATE

An innovative Colombian startup specializing in corporate E-learning in Latin America provides a comprehensive platform for managing and assessing employee performance at both individual and organizational levels. This platform facilitates talent development and fosters business growth.

DW DRUMS

It dominates the musical e-commerce sector with a vast array of drums on dedicated websites, providing musicians with the chance to showcase their passion and creativity through percussion.

DIEY.IO

A Colombian startup provides engineering, design, and computer science services for digital projects, utilizing artificial intelligence to choose suitable development teams.
