FULL STACK DEVELOPER

Parrolabs - March 2023 - present

- Front-end development of several websites, with a focus on enhancing user experience and maintaining visual coherence.
- Comprehensive server management involves configuring, monitoring, and executing DevOps tasks to maintain system stability and security.
- Close collaboration with multidisciplinary teams is crucial for proactively identifying and addressing business needs and customer requirements.
- Implementing development and maintenance best practices enhances operational efficiency and final product quality.

FULL STACK DEVELOPER

Linck Tech Solutions - April 2023 - February 2024

- Leadership in strategic project management entails collaborating closely with the client to comprehend their business needs and objectives.
- Comprehensive server administration and functionality integration.
- Offer continuous technical support and proactive maintenance to guarantee seamless project operation.
- Full-stack development in multiple commercial projects, from conceptualization to implementation, ensuring quality and efficiency at all stages of the process, both in the back-end and front-end.
- Active collaboration with multidisciplinary teams is crucial for ensuring the timely and successful delivery of projects, meeting client requirements, and maintaining quality standards.

FULL STACK DEVELOPER

Diey.io - December 2023 - September 2024

- Front-end development concentrates on crafting an intuitive and visually appealing graphical interface to improve the user experience.
- Backend development for multiple endpoints to ensure robust and efficient application functionality.
- Seamless integration of new features and components enhances system capability and versatility.
- Implement optimizations, refactorings, and enhancements to boost application speed and efficiency.
- Close collaboration with design and development teams is crucial to guarantee the consistency and quality of the end product.

FULL STACK DEVELOPER

The U-Corporate - July 2023 - March 2024

- Front-end development of the graphical interface to ensure an intuitive and appealing user experience.
- Establishing connections with the backend to facilitate seamless communication between the client and the server.
- Continual application maintenance involves troubleshooting, bug fixes, and deploying updates.
- Integration of supplementary features according to project specifications and client demands.
- Enhancing application performance through code optimization techniques, configuration tuning, and performance testing.

IT CONSULTANT

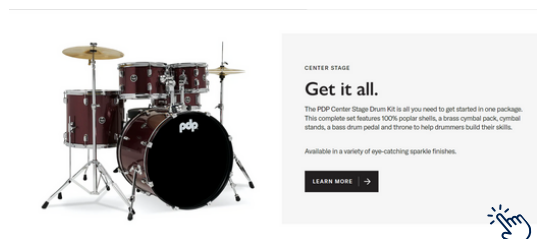

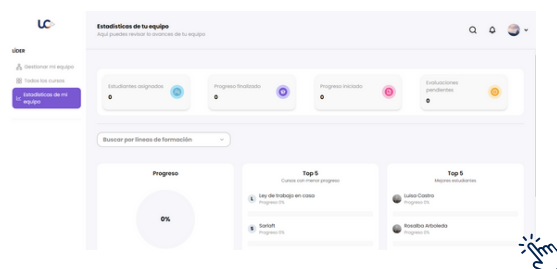

Kamay Catalizadora - June 2023 - September 2024

- Leadership and management of projects focused on the digitization of processes, improving operational efficiency and customer experience.
- Development of digital transformation strategies
- Implementation of tools and development of technological platforms and software.
- Development Full Stack Applications

PROJECTS IN WHICH I HAVE PARTICIPATED

THE U-CORPORATE

A Colombian startup that specializes in corporate E-learning in Latin America offers a comprehensive platform for managing and assessing employee performance at individual and organizational levels. This platform supports talent development and promotes business growth.

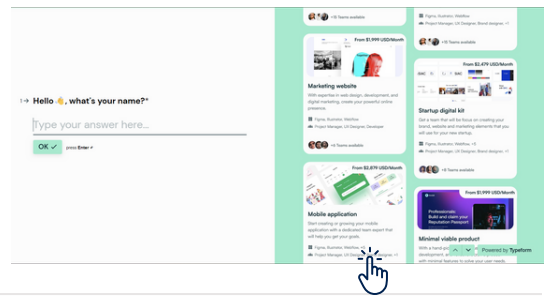

DW BATTERIES

Dominate the music e-commerce sector with a wide range of drums on dedicated websites, providing musicians the opportunity to showcase their passion and creativity through percussion.

DIEY.IO

A Colombian startup offers engineering, design, and IT services for digital projects, utilizing artificial intelligence to select appropriate development teams.
